

ASSIGNMENT 3

Algorithm

Question: Write A C++ Program that Calculates the Short Distance between two places.

USE GOOGLE SEARCH TO KNOW MORE!

Let's imagine that there are 4 ways to go from Cairo to Ismailia

We have a 4x4 dim array with the following distances values for every way:

Way1	10 20 50 6
Way2	6. 10 3 30
Way3	9 28 55 61
Way4	20 60 70 9

BY:MOHAMED ESSAM

Do the following:

- Sum every row to get the total distance of every row.
- Put the summation of every row in an array and sort them using selection sort.
