# Assignment 4
Music Player
Data Strucure

- Build a Music Player app that asks you to add your fav songs to an album, and sort it Ascending.
- You can go to the next element easily.
- And you can search on your fav song…

Notes:
- The data structure should not be fixed size.

- It should be easy to go forward and backward with it.

- **The Program Output Should run like this:**

```
Enter the song you want to add:
SiaLive
Do you want Continue? 1/0
1
Enter the song you want to add:
AdeleHello
Do you want Continue? 1/0
1
Enter the song you want to add:
DualibaBeTheOne
Do you want Continue? 1/0
0
AdeleHello
DualibaBeTheOne
SiaLive
Your Current song is :AdeleHello
Do you want go to the next song? 1/0
1
Your Current song is :DualibaBeTheOne
Do you want go to the next song? 1/0
1
Your Current song is :SiaLive
Do you want go to the next song? 1/0
0
Search on your fav song:SiaLive
SiaLive
```
